CODE N’ CREATE / ELECTRICAL ENGINEERING

Tuesday Bell Ringer | Grades 5-6

Name: _____ Date: _____

4 questions • Show calculations when asked • Use your resistor color chart if needed

1. DECODE

A resistor has bands RED – RED – BROWN – GOLD. What is its resistance in ohms? What does the gold band tell you?

2. DECODE

A resistor has bands YELLOW – VIOLET – BROWN – GOLD. What is its resistance? Identify the tolerance percentage.

3. ENCODE

Write the four color bands for a 330 Ω resistor with ±5% tolerance.

4. ENCODE

Write the four color bands for a 1,000 Ω resistor with ±5% tolerance.
