CODE N’ CREATE / ELECTRICAL ENGINEERING

Tuesday Bell Ringer | Grades 7-8

Name: _____ Date: _____

4 questions • Show calculations when asked • Use your resistor color chart if needed

1. DECODE + RANGE

RED – RED – BROWN – GOLD. Find nominal resistance and the lowest/highest allowed values.

2. DECODE + RANGE

YELLOW – VIOLET – BROWN – GOLD. Find nominal resistance and its tolerance range.

3. ENCODE + RANGE

Give four bands for 330 Ω ±5%. Calculate its acceptable resistance range.

4. ENCODE + RANGE

Give four bands for 1,000 Ω ±5%. Calculate its acceptable resistance range.

Student worksheet • Do not measure resistance in a powered circuit.
